

Novaflex Offshore

Potable Water Hose 200 psi

Novaflex Offshore 200psi Potable Water Hose is used as a bulk transfer hose in the offshore oil and gas industry. Used to transfer from shore to ship and ship to rig the potable water used for a variety of human consumption purposes. This hose meets the FDA requirements for potable water hoses to be used for transferring water for human consumption of imparting no taste, odor or flavor into the water. It has a custom blue cover to distinguish it from the other non-potable hoses.
